

How the buttercup got it's name

By Evonne

The buttercup got it name from the butter they give out in cups. How do they get the cups? When they are a sprout I bury cups next to them, so that's how they get a cup to hand out.

The butter is sweet thanks to the butter I give them. Also that's how they get the butter. To make it creamy you have to put a cow over it so you can give it milk for breakfast.
